satisfaction score

Group expertise, delivered locally.

ATT Systems (India) Private Limited is the India entity of the ATT Systems Group, headquartered in Singapore. The Group has been "Creating The Difference" for its clients through consistent innovation and 24/7/365 customer care, and the India team carries that same mandate — designing, deploying and supporting mission-critical systems for healthcare, government, defence and enterprise clients.

Our portfolio spans Enterprise IT Systems, Integrated Security Management, Traffic Management and the flagship SUBS and Q'SOFT® platforms, alongside system integration, software development and technical support delivered from our India operations base in Karnataka.

"We possess the required experience and technical capability for supply, installation, testing, commissioning and support of similar systems, backed by the necessary technical manpower and infrastructure for successful project implementation."

ATT Systems (India) Private Limited — Performance Undertaking

OUR JOURNEY

ATT Systems Group founded

Singapore headquarters established, building Enterprise IT, Security and Traffic Management Systems for government and enterprise clients.

2007 — India operations begin

ATT Systems (India) Private Limited is established to deliver the Group's portfolio to Indian healthcare, government and enterprise clients.

Public healthcare deployments

Q'SOFT® and access control systems go live across ESIC Hospitals and AIIMS Delhi.

Diplomatic & international clients

Security and access control for the Embassy of the Philippines and the Singapore Food Agency's visitor management system.

Flagship platforms mature

Q'SOFT® becomes a registered trademark (TM No. 2515520) while SUBS scales into traffic, security and emergency-management deployments.

ACCOUNTABLE, ON THE GROUND

Anandkumar PM

Director, ATT Systems (India) Private Limited

24/7/365 support

Technical support and maintenance backed by the Group's regional support network.

ISO-aligned delivery

Aligned to the Group's quality, environmental, health, safety and data security standards.

SECTORS WE SERVE

Healthcare

Government

Defence

Financial

Diplomatic

Transport & highways

Four solution groups. One delivery team.

Enterprise IT Systems, Traffic Management, Integrated Security Management, and the services that keep them running — designed, deployed and supported in India.

01 Enterprise IT Systems

The software and hardware layer between an organisation and the people it serves — cutting wait times and digitising registration.

- Queue Management Systems (Q'SOFT®)
- Visitor Management System
- Kiosk Operation Solution
- Payment Services Solution
- Room & Online Resource Booking System
- Intelligent Monitoring Alert System

02 Traffic Management

Technology that integrates into existing or new infrastructure for smart cities, highways, airports and transport authorities.

- Intelligent Traffic Management System
- Expressway & Tunnel Management System
- Traffic Communications System
- Real-time GPS Fleet Monitoring & Route Optimisation

03 Integrated Security Management

Protecting visitors, employees and assets — unified so security teams see one picture.

- Access Management System
- Surveillance Security System
- Intrusion Management System
- Integrated Security & Environmental Monitoring System (ISEMS)
- Video & Voice Recording System
- Vehicle Security System

04 Services

The support structure enterprise and government clients expect, long after go-live.

- 24/7 Maintenance & Support
- Project Management — scoping to handover
- Solution Design & Consultancy
- SaaS Delivery for OPEX-preferred organisations

FLAGSHIP PLATFORMS

SUBS — Smart Unified Backend System

AI-powered unified command and operational intelligence platform for traffic, enforcement, emergency response and security governance.

Q'SOFT® Queue Management

Digital tokens, appointments and real-time monitoring for banks, hospitals, government offices and service centres.
