HOW IT WORKS

Every step of the visit, managed.

Q'SOFT® is built from 16 modular hardware and software components. Each one serves a step in the customer's visit — and every one reports back to the same central platform.

01

Book ahead

Customers schedule visits online or register their arrival from their phone, reducing walk-in load at the counter.

- Appointment Scheduler
- mConnect

02

Arrive & register

Kiosks and terminals capture customer details, issue tickets and direct each visitor to the correct counter.

- Kiosk Management System
- Customer Request Terminal
- Queue Ticketing Kiosk
- RFID

03

Wait, informed

Clear displays and notifications show live queue numbers, so customers know exactly where they stand.

- LED / LCD Displays
- Queue Media Display
- SMS Solution
- Room Display Management

04

Get called & served

Staff call the next customer from the counter or on the move — with portable alerts for customers who need assistance.

- Recall Terminal
- mTab
- iBuzz

05

Share feedback

Customers rate their experience, giving structured feedback on satisfaction and individual staff performance.

- Feedback Solution

06

Manage & improve

Administrators track queues and staff productivity across every location through reports and tailored interfaces.

- Web / Reporting Admin
- Interface Component Solutions

WHY Q'SOFT®

Take the stress out of waiting.

The challenge

Customers queueing for hours. Complaints about who is next. Staff hastily doing their job while the waiting area fills up. The result is a frustrating, stressful service experience for everyone involved.

The Q'SOFT® answer

A customised queue solution that offers control and flexibility in managing queue flow — digital tokens, appointments, live displays and notifications, backed by reporting that shows where time is being lost.

CORE CAPABILITIES

Digital tokens & appointments

Token generation at kiosks and terminals, plus internet-based appointment scheduling.

Real-time monitoring

Live queue status on displays, with SMS and app notifications for customers.

Analytics & administration

Centralised administration with queue and staff performance reports.

Finds the bottlenecks

Capable of identifying current and potential future bottlenecks.

Integrates with your systems

Works with third-party software and systems to increase productivity by reducing process steps.

Simple installation

Quick to install, yet packed with powerful and comprehensive features.

BUILT FOR

- Hospitals & healthcare
- Banks & finance
- Government offices
- Retail outlets
- Customer service centres

PROVEN IN PUBLIC HEALTHCARE

- ESIC Hospitals
- AIIMS Delhi
- ESIC Gulbarga

24/7

Support beyond go-live. Round-the-clock maintenance and technical support, end-to-end project management, solution design and consultancy, and SaaS delivery for organisations that prefer OPEX over CAPEX.

COMPONENT REFERENCE

16 building blocks, one connected system.

Mix and match to fit the site, the counter and the customer — share your floor plan and counter count, and we'll map the right components to your layout.

01 **Appointment Scheduler**
Internet-based appointment scheduling with automatic server updates.

02 **Customer Request Terminal**
Customer registration and ticket issuance — the first touchpoint.

03 **Feedback Solution**
Measures satisfaction and gathers feedback on staff performance.

04 **Interface Component Solutions**
Customised GUIs built around each client's day-to-day operations.

05 **Kiosk Management System**
Captures customer information and directs visitors to the correct counter.

06 **LED / LCD Displays**
Customisable displays with clear visibility in high-motion environments.

07 **Queue Media Display**
Branding, advertisements and scrolling messages alongside queue info.

08 **Queue Ticketing Kiosk**
Reduces per-customer transaction time at ticket issuance.

09 **Recall Terminal**
Calls queued customers back through a dedicated staff interface.

10 **RFID**
Distance-based, contactless customer identification via electronic tags.

11 **Room Display Management**
Live queue numbers and room status outside consultation rooms.

12 **SMS Solution**
Queue-number notifications and automatic reminders.

13 **Web / Reporting Admin**
Queue and performance reports across every location.

14 **mConnect**
Mobile app to register arrival and check live queue information remotely.

15 **mTab**
Lets staff call and serve customers while mobile on the floor.

16 **iBuzz**
Portable buzzer with customised alerts for physically challenged customers.
